

Product information

FoxDuster microfibre cover

Characteristics

- no displacement of dust;
- suitable for all hard surfaces;
- high dust-collection capacity;
- fast and easily interchangeable.

The Greenspeed® [FoxDuster](#) should not be missing in your range of cleaning articles. This flexible dust remover is multifunctional, so it is indispensable. The microfibre cover consists of a mix of microfibre and polyester fibres. This combination ensures a high electrostatic charge, causing the dust to stick to the material.

While cleaning, you can beat or vacuum the cover several times to remove dust. After completion of the cleaning task, the FoxDuster microfibre cover has to be laundered.

The cover is available in the sizes small and medium, depending upon the FoxDuster holder you use. The accompanying FoxDuster holder is available separately.

Specifications

Colour	green/white
Dimensions	21 (l) x 10 (w) cm (small) and 29 (l) x 10 (w) cm (medium)
Composition	70% polyester microfibre, 30% polyester
Weight	± 50 grams (small) and ± 86 grams (medium)
