

Sprint – Floor cleaning

SPRINT

Sprint is the versatile flat mop system for almost all application areas. Its low holder weight, its outstanding glide properties in combination with different covers and its ergonomically convincing telescopic handle make the Sprint a reliable and flexible alternative for users of every height. Sprint stands for labour-saving and hygienic work with optimum surface coverage and outstanding cleaning results. All this is provided by the convenient and easy-to-operate flat mop system with the multifunctional Sprint holder and patented foot button in two different sizes.

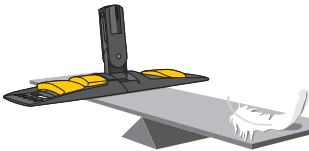

Flat mop systems, simple and convenient to use, with a large selection of mops and accessories.

Sprint – Floor cleaning

Sprint Plus

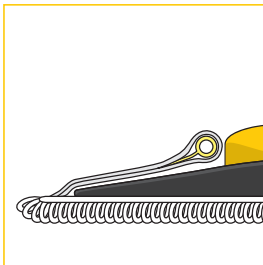

With the Sprint Plus system, you can wring out your mop without removing it from the holder. "No-touch" and therefore particularly hygienic. In addition to the conventional pockets, the Sprint Plus mop comes with a strap which is inserted into the matching Sprint Plus holder.

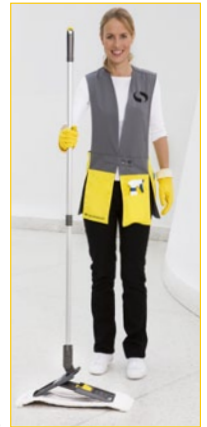

With its low weight, the Sprint Plus holder makes the daily work routine easier.

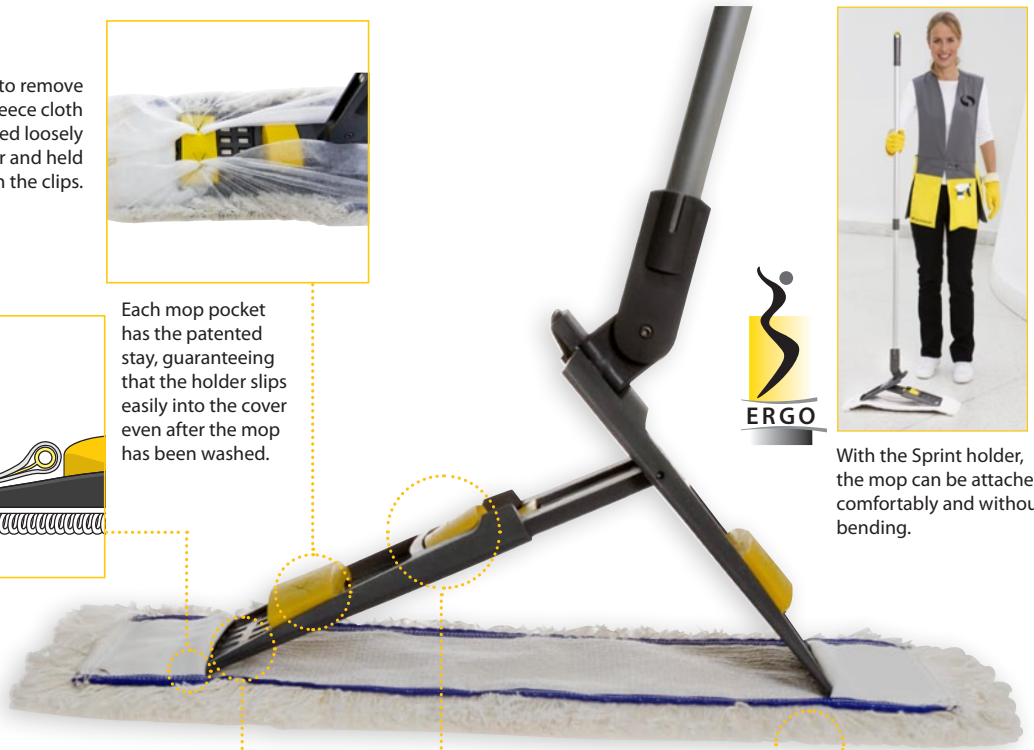

For initial cleaning to remove loose dirt, the fleece cloth can be wrapped loosely around the holder and held in place with the clips.

Each mop pocket has the patented stay, guaranteeing that the holder slips easily into the cover even after the mop has been washed.

With the Sprint holder, the mop can be attached comfortably and without bending.

The opening on the upper side of the Sprint plus holder allows the dosed cleaning agent to be poured directly onto the mop when using the sprinkling method.

Thanks to the patented foot button, the Sprint holder can be opened and closed with ease.

Cut outer fringes are recommended for very rough surfaces and skirting boards.

Looped fringes are ideal for lifting dirt.

Floor cleaning – Sprint

F1 Flat wringer

With the Flat wringer F1, the Sprint mop can be rinsed and wrung out hygienically without hand contact and with a considerable time saving, without having to be removed from the holder. The high quality F1 wringer in durable stainless steel can be combined with the VERMOP Equipe, Orbit und Variant trolley systems.

Vertical wringer VK 4

The VK 4 wringer allows the Sprint mop to be wrung out to exactly the degree of moisture the user wants. At the softpoint, the cover is automatically wrung out by the wringer without pressure on the lever for an optimum wringing result – effortless.

Des tub

The Des tub is ideally suited to one-step disinfectant cleaning in hospitals using the Sprint mop. With dosed moistening of the mop in the Des tub, the cover gets exactly the degree of moisture the user wants. Simply press the dosing pedal in the tub grid with the holder.

Pre-Wash

With the Pre-Wash process, the treated Sprint covers can be transported hygienically to the storage point after central treatment, for example in the Moboxx. The mops are attached ergonomically without bending, directly from the Moboxx. The Pre-Wash process can be combined with all VERMOP trolley systems * and is also ideally suited to one-phase disinfectant cleaning or general cleaning.

VERTICAL WRINGER VK 4

The VK 4 is the new vertical wringer generation from VERMOP. With its innovative design and the use of long-lasting and durable plastics, this wringer makes a convincing impact in daily practice. The VK 4 works with a knee lever mechanism made in high-quality plastic, the use of parts susceptible to corrosion has been completely discontinued. This extends the service life of your wringer. The VK 4 is compatible with all VERMOP trolley systems and wringer stands.

code: 8714.. price: 70,20 €/ each PU: 1

The VK 4 wringer is suitable for wringing out flat and fringed mops.

Multiple combination options: The VK 4 wringer can be used with the following VERMOP trolley system: Equipe, Orbit, Variant, Shopster, Varietta, Logo, AquvaVIZ, wet mop trolley. It is compatible with all existing VK wringer stands.

Durable and high-quality materials are used for the VK 4 wringer. This guarantees a long service life.

Effortless wringing.

Due to the knee lever in high-quality plastic, the wringing mechanism is particularly stable.

Notice: For wringing out thinner mops, VERMOP recommends using a wringer inlay.

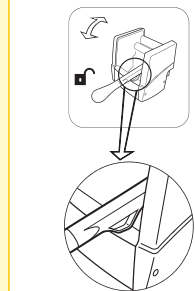

Softpoint

Wringing without effort with Softpoint

The highlight of the VK 4 is the so-called „Softpoint“: at the point of maximum pressure of the wringer, the lever locks.. The cover is independently wrung out by the wringer. If you wish to operate the wringer in the „classic“ manner without a softpoint, simply turn the lever around.

Classic method

F1 FLAT WRINGER

code: 8670.. price: 242,40 € / each PU: 1

The new F1 Flat wringer from VERMOP makes a convincing impact in daily cleaning with its flexibility, durability and time-saving properties. Wringing and rinsing, without taking the mop from the holder – with the F1 Flat wringer, it's no problem. It is suitable for wringing out all 40 cm Sprint mops and can be combined with many VERMOP cleaning trolleys. High-quality stainless steel and careful workmanship make the wringer robust and reliable – even for heavy-duty use. Quality – Made in Germany!

High-quality stainless steel makes the F1 flat wringer robust, durable and reliable

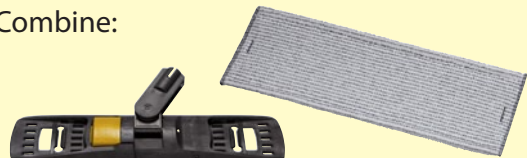

Save time – wring and rinse with the F1 flat wringer, without removing the mop from the holder.

You can use the F1 flat wringer with all existing Twixter wringer stands. It can be combined with many VERMOP trolley systems and is available in four colours.

blue (01), red (02),
green (04), yellow (05)

Combine:

The F1 flat wringer is ideal for general cleaning with the Sprint Plus holder and the 40 cm Sprint Mop. Particularly in combination with the new Sprint Chrome mop, you achieve optimum results with the F1 wringer.
