eng

+option inFRAME

- 1 Indestructible stainless steel cover
- 2 Shock absorber for an easy opening of the cover
- 3 Anti-fingerprint coating

The assembling of the intelligent stainless steel dispensers in the wall creates a unique washroom ambiance. Thanks to the inFRAME made of stainless steel, the dispensers can be integrated in all walls, whether solid walls, aerated concrete, wood constructions, dry constructions, glass or metal. The assembling of the inox inFRAME by a professional craftsman guarantees a smooth installation of the dispenser later on.

+option Aura

The illumination of the dispenser silhouette emphasizes the noble design of the XIBU inox dispensers and creates a unique atmosphere. A true highlight for individual interior decoration. The LED lights can be individually adjusted with the included RGB-control unit. Requires the powerPACK.

+option powerPACK

The sensor controlled dispensers can be operated with powerPACK mains adapters. Alternatively, batteries can be used for the electricity supply.

+option exFRAME

+option exFRAME

The exFRAME option allows to equip virtually every washroom with indestructible stainless steel dispensers. Easy wall mounting, suitable for all kind of walls.

The dispenser unit fits in both the exFRAME as well as the inFRAME. A very flexible system enabling a cost-efficient change to the inFRAME option, for example after a reconstruction.
